This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. REPORT

OF

THE CHIEF OF THE BUREAU OF STATISTICS.

TREASURY DEPARTMENT,
BUREAU OF STATISTICS,
November 30, 1877.

SIR: The Chief of the Bureau of Statistics has the honor to submit the following report of its operations during the fiscal year ended June 30, 1877.

CLERICAL FORCE.

The regular clerical force of the bureau at the close of the year, in addition to the chief clerk, Mr. E. B. Elliott, consisted of 18 male and 8 female clerks, the greater part of whom were employed in the following divisions:

Divisions.	Names of chiefs.	Number of clerks.		
		Males.	Females.	Total.
Examination	J. N. Whitney	3	1	4
Compilation*	William Burchard	8	2	10
Tonnage and immigration	L. F. Ward	2	1	3
Registry of merchant-marine	J. B. Parker	1	2	3

* The section of this division engaged in the compilation of the home-consumption statements is under the more immediate charge of Charles H. Evans.

Other stated and miscellaneous work of the bureau was performed as follows:

Publication, in charge of James Ryan (who is also stenographic clerk to the chief of the bureau); stationery, pay, property, and copying, of J. D. O'Connell; revision and translation, of A. H. Girard; and library and files, of Miss M. A. McMakin.

In addition to the above, there is also a division, in another building, in charge of Joseph Nimmo, jr., for the purpose of gathering and collating statistics of domestic commerce, transportation, &c., which is again referred to on a subsequent page.

REDUCTION OF THE CLERICAL FORCE.

The large reduction in the clerical force of the bureau, made under the act of August 15, 1876, did not fully take effect until October 10th of the same year. Since that time every effort has been made by the undersigned to keep the work of the bureau in a forward state of com-

pleteness, and also, from time to time, so far as possible, to furnish to Congress and to the public such information as was asked for. As the second session of the Forty-fourth Congress was of short duration, the undersigned, while unable to institute all the researches required to obtain information of a statistical character, was yet able, by extra exertion, to respond to those which were most important for purposes of legislation. The demands for information which have already been made, and which no doubt will continue to be made by committees and members of both Houses of Congress during the approaching long session, will be as promptly responded to as is possible, while, at the same time, every exertion will be made to keep up the current work of the bureau.

PUBLICATIONS OF THE BUREAU.

The quarterly and annual reports on the commerce and navigation of the United States, as also the annual list of merchant-vessels, have been compiled and published, as usual, during the year. In addition to the quarterly reports, monthly summaries of the imports and exports of the country have been regularly published in order to supply the demands of the public for early and frequent statistics of our foreign trade. To avoid the delay of a few days which is required for compilation, and the time occupied in printing this summary, the undersigned supplies the press at the earliest possible moment with a statement of the total value of the imports and exports of each customs-district during the month immediately preceding. The prompt dissemination each month of the facts concerning the course and volume of trade, and of the detailed printed statements which periodically follow, is highly appreciated by the public, as is shown by the earnest commendations of writers for the press, of economists, and of the commercial public, to whom the quarterly reports possess value in the detailed information which it contains, although it fails to supply the facts at as early a date as is desired.

Annual Report on Commerce and Navigation.—Although the earlier portions of the volume for the fiscal year 1876 were prepared and sent to press at the usual period, yet the later statements, relating chiefly to navigation, were delayed in consequence of the reduction of the clerical force of the bureau. Notwithstanding the small number of compiling clerks, the statements relating to commerce for the fiscal year 1877 have been prepared and sent to the printer as early as on any previous year. As, however, owing to the cause already indicated, the preparation of the Navigation Statements has been delayed, it has been deemed best to issue a few hundred copies of Part I of the volume, which includes all that directly relates to commerce, and comprises about three-fourths (729 pages) of the whole, and which is of more immediate value to legislators and commercial writers than the statements which relate to navigation. To delay the publication of the annual report until the whole is completed would greatly impair its usefulness for commercial and legislative purposes. The Navigation Statements will be compiled and the volume completed at the earliest moment which is possible with so small a force.

SPECIAL REPORT ON IMMIGRATION.

Copies of this report in the French language continue to be, occasionally, forwarded to France, Belgium, and Switzerland; and it is proposed to forward a considerable number to Paris for distribution during the

forthcoming International Exposition. As the English and German editions are entirely exhausted, the undersigned recommends that two thousand copies of each be printed for distribution in the countries where those languages are spoken. When requests come from portions of our own country, or of the British dominions, they are either not complied with or copies in the French language are forwarded. Urgent requests for the report are now on file from London and other parts of Great Britain, but they are as yet unsupplied. It is deemed important that a supply be kept at each United States consulate in the United Kingdom, for although emigration from that country has greatly decreased there is considerable inquiry from England and Scotland on the part of small farmers, skilled mechanics, and men of small means, in regard to the advantages which the United States offers as compared with those of the British possessions in Canada and Australia. The report under consideration furnishes information which may induce those who contemplate removing to a distant land, to make their home in this country. As it is stereotyped, and as the price of paper is exceedingly low, the cost of a small edition would be inconsiderable.

Although the influx of immigrants from German-speaking countries is not by any means as great as it was in the past, yet our material wealth has been considerably increased, not only by natives of Germany, but of Austria and those parts of Russia and Switzerland where the German language is spoken. During the past year a number of that industrious people known as the Mennonites, came from Russia to our country, and it is believed that others might have been induced to come if proper information had been supplied to such as had decided to emigrate, but had not selected the country.

It has already been mentioned in former years that this report was translated into the Swedish language, and its publication suggested for distribution in Scandinavian countries; but while this expenditure would, it is believed, prove advantageous, the printing of an edition in the English language from the stereotype-plates, also one in German, is deemed of primary importance. If this were done it would be unnecessary to transmit, as now, a copy in a language probably unfamiliar to the recipient, who might, were it in his vernacular, be induced to make this country his future home.

INTERNAL COMMERCE AND TRANSPORTATION.

As stated in former reports, the division of internal commerce was formed in July, 1875, and, in compliance with the provisions of the act of March 3, 1875, experts were employed at the chief commercial cities of the country, who were selected on account of their knowledge of commercial affairs and the facilities which their opportunities afforded them for furnishing the kind of information required.

The first annual report, prepared by Mr. Joseph Nimmo, jr., was issued June 30, 1877, to which period the statistical and other data were brought down. The report covers statements as to the relative magnitude and importance of foreign and domestic commerce; a description of the trunk railroads of the country; a discussion of the economic and other considerations affecting the cost of transportation by rail; a description of the interior water-lines and a somewhat elaborate statement of facts as to the competitive forces which exert a controlling influence over the commerce of the country; a description of the principal commercial movements of this country, and of the various forms of governmental regulation of railroads adopted in this and in foreign countries

a statement in regard to the efforts made by the various States to regulate the railroads, and as to the various forms of aid granted to railroads in the United States; also a brief descriptive dissertation upon the railroad question in foreign countries.

The report proper is embraced in 215 pages, followed by 13 maps illustrating the principal transportation-routes; and three charts, showing the movements of grain, together with an appendix of 257 pages, embracing the reports of experts, and statistical and other data of interest. Experts have been appointed for the current fiscal year, and it is believed that the second annual report will be ready for the printer about the first of June next.

LIST OF MERCHANT VESSELS OF THE UNITED STATES.

The ninth annual statement of vessels registered, enrolled, and licensed under the laws of the United States, designating the class, name, tonnage, and home port, as well as the official number and the signal-letters awarded to each vessel, was prepared, and 2,500 copies published for distribution to the officers of customs, to the masters of vessels engaged in the foreign trade, to the principal ship-owners, and to the commanders of the war-vessels of the United States.

This list also includes the vessels belonging to the United States Navy, giving the name, rate, class, guns, tonnage, means of propulsion, and station of each. It also includes the vessels belonging to the Revenue Marine, giving name, description, rate, guns, tonnage, station, or condition, when and where built, number of officers and of men, also cruising-grounds; vessels belonging to the Light-House Board establishment, giving rig, name of vessel, and tonnage; also vessels belonging to the United States Coast Survey, giving class, name of vessel, tonnage, when built, and where employed.

To each of the vessels of the several establishments above mentioned have been assigned signal-letters to be used in conveying distinguishing signals at sea. These signal-letters are now published with respect to the United States Revenue Marine, the United States Light-House Board, and the United States Coast Survey, for the first time.

There is also inserted in this volume, as in the last previous annual list, a diagram or chart of the flags used in conveying the distinguishing signals according to the system known as the International Code of Signals, together with a brief explanation in regard to their use.

DECLINE IN IMMIGRATION.

Immigration, which reached the highest point in 1873, has gradually continued to decline, the falling off from the year 1876 being 28,129, and 317,946 from 1873.

The following comparative statements will exhibit the leading facts connected with immigration from 1872 to 1877 inclusive:

Comparative statement of immigration and emigration for the five fiscal years from July 1, 1872, to June 30, 1877, inclusive.

TRADE WITH CANADA.

During the year ended June 30, 1877, the total value of domestic merchandise and produce exported to Canada, and which was omitted in the return of the United States customs officers on the Canadian border, as appears from the official statements furnished by the commissioner of customs of the Dominion, amounted to $13,051,798, as against $10,507,563 in the preceding year, $15,596,524 in 1875, and $11,424,566 in 1874.

The following statement shows the values of the articles exported to the provinces of Ontario, Quebec, and Manitoba, during the last fiscal year, of which no returns were made to this bureau from the United States collectors of customs on our northern border:

Statement, according to Canadian accounts, showing the imports into Ontario, Quebec, and Manitoba, from the United States, in excess of the domestic exports from the United States to Canada, as returned to the Bureau of Statistics by United States collectors of customs, during the fiscal year ended June 30, 1877.

It will be observed that the larger portion of these articles exported to Canada, of which no returns are made to this bureau from United States customs-officers, consists of manufactures of iron, cotton, wool, leather, &c., which require in their production the employment of a considerable amount of skilled labor; while refined sugar and some other articles, which employ less labor, require the investment of a large amount of capital.

As the attention of Congress and of the public is engaged at the present time in the consideration of the inquiry, How can the exports of our domestic industries be increased? it is highly desirable to know, with approximate accuracy, what are the values of leading articles which find a market in other countries, especially in Canada.

The omission of about a million of dollars in the value of manufactures of iron, of $1,600,000 in that of refined sugar, of nearly $2,000,000 in manufactures of cotton, of two-thirds of a million in manufactures of wool, and the same amount in books, paper, and stationery; and in anthracite coal; of over $600,000 in preserved meats, and over half a million in leather and boots and shoes; of $323,000 in hats and caps, and $216,000 in jewelry, not only reduces the aggregate amount of exports and thus renders the official figures to that extent inaccurate, but tends to dwarf the importance of these several industries, and to mislead those who desire to obtain correct data for the use of economists, or for purposes of legislation.

It is true that the desired information is annually furnished to the Bureau by the Commissioner of Customs of the Dominion, but even with the data obtained from so respectable and trustworthy a source, the undersigned does not feel justified in incorporating the figures with those returned by our customs-officers on the border.

Since writing the foregoing, the following official letter, in relation to the same subject, has been received:

CUSTOM-HOUSE, BUFFALO, N. Y.,
Collector's Office, December 8, 1877.

Respectfully referring to your letter of the 6th instant, calling for statement of domestic exports, form No. 13, for the month of October, 1877, I have to say that the delay has been occasioned by the neglect of the railway lines crossing the frontier at this point to file manifests of exports by land-conveyance to Canada.

Frequent requests have been made to the representatives of the railways mentioned,

for the information required, but without success, and as I know of no law compelling them to furnish such manifests, I am therefore obliged to submit statement of domestic exports by vessels for the month of October as comprising the only information upon the subject at my command.

Very respectfully,

JOHN TYLER,
Collector.

EDWARD YOUNG, Esq.,
Chief Bureau of Statistics, Washington, D. C.

In 1874 the undersigned had an interview at Buffalo with the freight agent of the railway which transports the greater part of the merchandise to Canada, who promised to furnish the information required by the customs-officers, and this courtesy has, until now, been extended, and it was hoped would continue. If, however, the Collector at that port be unable to obtain manifests showing the kinds and values of merchandise which find a market in Canada, future returns will exhibit greater omissions. During the fiscal year ended June 30, 1877, the domestic exports from the district of Buffalo Creek, as returned to this Bureau, amounted to $320,255; for the month of October, 1876, $30,000, and for September, 1877, $18,618, while for October, 1877, the amount returned was only $1,856, in consequence of the failure of the officers of railway companies to furnish the information desired.

In view of this and the other facts already submitted, the undersigned once more respectfully but earnestly asks for such legislation as will remedy the defect already indicated.

NUMBER AND TONNAGE OF VESSELS.

A statement showing the number of vessels and amount of tonnage belonging to the different customs-districts of the United States on the 30th of June, 1877, geographically classified, is appended to this report (marked A). The returns by collectors of customs to this Bureau purport to show the number and tonnage of all vessels belonging to each customs district, without regard to the district in which they may be temporarily enrolled or licensed, but with regard to ownership. Special pains have been taken, through correspondence with customs officers at the several ports, to urge upon them the necessity of furnishing the Bureau with full and exact statements in regard to these facts. The aggregate tonnage given in the appended statement is as follows:

Class of vessels.	Vessels.	Tons.
Sail	17,315	2,392,597.82
Steam	4,275	1,196,878.67
Unrigged, including a large proportion exempted by law from enrollment and license	8,216	1,007,307.37
Total	29,806	4,456,783.86

IMPORTS AND EXPORTS.

Detailed statements of imports into and of domestic and foreign exports from the United States during the fiscal year 1877, as compared with that of 1876, in which the increase and decrease are respectively indicated; also condensed comparative statements of the net imports and of the domestic exports during the last three fiscal years are appended to this report, (marked B.)

There is also appended a statement (marked C) exhibiting the aggregate values of imports and exports during the eighty-eight fiscal years ended June 30, 1877, distinguishing merchandise from coin and bullion.

Respectfully submitted.

EDWARD YOUNG,
Chief of Bureau.

Hon. JOHN SHERMAN,
Secretary of the Treasury.

COMMERCE AND NAVIGATION.

1877.

PART I.—COMMERCE.

No. 1.

STATEMENT,

BY DISTRICTS,

SHOWING THE

TOTAL VALUE OF IMPORTS FROM, AND OF DOMESTIC AND FOREIGN EXPORTS TO, THE PRINCIPAL FOREIGN COUNTRIES

DURING THE

FISCAL YEAR ENDED JUNE 30, 1877.

No. 1.—*Statement, by Districts, showing the Total Value of IMPORTS from, and of DOMESTIC and FOREIGN EXPORTS to, the principal Foreign Countries during the fiscal year ended June 30, 1877.*

NOTE.—The values of the import entries in this and the following statements are expressed in specie, being the sworn values at the foreign places from which exported to the United States. The foreign exports, or exports of imported commodities of foreign origin, are also stated in specie values at the ports from which they were originally exported to this country. The exports of domestic produce and manufactures are, however, expressed in currency values at the domestic places of export, with the exception of exports of gold and silver and of commodities from ports on the Pacific coast, the values of such exports being expressed in specie.

*As the returns received by this bureau of passengers departing from the United States do not distinguish permanent emigrants from transient travelers, the figures entered in this column have been derived from the body of the table by deducting the number of "non-immigrants" from the whole number of departures for each year, the process being based on the consideration that of the former number those who are reported as "citizens of the United States" have previously departed and been embraced in the reports of departures, while those reported as "aliens not intending to remain" will depart in future and be so reported. These figures will therefore be substantially correct for any series of years, but may not be strictly so for any one particular year.
